

# Recycle

## Total Waste Management services that give you complete confidence.

The purpose of our Total Waste Management service is to free you from the complexities of collection, transportation, disposal and legislative compliance. *Quite simply, we sort it all out for you.*

We can provide a comprehensive start to finish service. We handle all waste from metal to hazardous waste. Once we've evaluated your waste output, we put systems in place to manage it efficiently and compliantly, including secure storage on site, regular collection and transportation to our recycling centres.

We follow through procedures to accurately record your waste materials using our CCTV monitored weighbridges. You can be confident that your waste assets are being correctly valued and we support this with a fully auditable paper trail. We don't just offer competitive prices; because of our wider industry contacts we are also able to minimise waste costs.

If necessary, we can provide a secure destruction service with photo/video evidence and a Certificate of Destruction.

# Recycle

We pride ourselves on service, and we take our responsibilities to you and to the environment very seriously. We provide a dedicated account manager who has the attention to detail to understand your operation inside out, and tailor our services accordingly. We ensure that all waste is handled safely and responsibly, and recycle as much as possible to minimise landfill. All of our facilities operate to the highest standards, we have strong ethics in the sale of recycled commodities, and we operate modern, efficient plant and machinery to minimise our energy needs and emissions.
