

The employer

Are you looking for a job in IT at one of the UK's largest privately owned companies?

In the UK alone, we employ more than 2,000 people at 70 locations.

Investing in our future workforce is important to us and we're always looking for hard working people to join the ever expanding team. Our growth over recent years has seen a need for the strengthening of some of our internal support functions based at Head Office in Warrington. As a result, we are looking to recruit a German speaking IT apprentice to join the integral team.

The IT apprenticeship scheme

We are pleased to offer the successful candidate the opportunity to complete an Advanced apprenticeship for IT & Telecoms Professionals which will take place over 24 months and will be delivered in partnership with Warrington Collegiate.

Apprentices will attend college one day per week, with the remaining four days in the EMR IT Department where they will spend time working with our IT helpdesk team, learning how to handle technical queries, providing software and hardware support and assisting on new projects. The helpdesk provides an essential function for the company and offers support to all elements of the business.

The successful candidates will also gain exposure to other parts of the business during some basic induction training.

All training will be provided during the apprenticeship programme with candidates simply needing GCSEs (A to C grade) in German, English, Maths and ICT. A positive attitude towards hard work, an enthusiasm for learning and continually developing as an employee and the ability to work an eight hour day within the hours of 6am and 6pm (as specified on a weekly basis) are also essential.
