

MBA Polymers is the world leader in producing post-consumer recycled plastics from end-of-life goods. Our customer base is broad, varying from some of the most renowned manufacturing organisations in the world, to local SME injection moulding facilities. MBA Polymers can also boast the most technically advanced plastic recycling facilities on the planet and is changing the way the world views recycled plastic. Our site at Worksop is a joint venture with the leading metal recycler in the UK and one of the largest in the world - EMR Group.

Technical Applications Engineer - Polymers

This role will provide pre-sales technical assistance, as well as technical support to a wide range of customers. The Sales Teams will be reliant on your expertise and knowledge of Polymers as the business manages a portfolio of product developments (from definition of customer requirements, through compounding and design to standard product). The Technical Applications Engineer will also work closely with customers to advise on grades of plastics as well as providing solutions that will optimise their equipment. The role may also include trials, tests and developments on site at MBA, as well as customer premises.

The Technical Applications Engineer also works directly with Plant Development Engineers and Process Improvement Engineers to ensure products are developed in line with specifications and budgets. Our product applications are varied and often bespoke to our customer's requirements; as such there will often be the need to take a Projects based approach.

The Person:

The ideal candidate will have detailed knowledge of Polymers and Injection Moulding, along with qualifications in a relevant discipline: Engineering, Polymer Science, Materials Management or Chemistry etc. The role will suit a technically strong candidate keen to expand their involvement in Sales and Product Development. Please note it is not essential to have worked in the recycling industry previously.

Applicants should be exceptional communicators, with the ability to work with a range of stakeholders both internal and external. The ability to provide effective solutions to customer requirements whilst influencing key decision makers will be pivotal to the success of the role.

This role will require UK Travel and occasional International Travel.

Application:

Please apply to recruitment@emrgroup.com with an up to date CV and details of your current salary. Alternatively an application form can be requested by contacting the same Email address.

Our employees have helped build the organisation into the world leading recycling company it is today.
