

EMR is a global leader in metal recycling employing 4500 staff across 170 locations around the world. EMR's processes are underpinned by advanced systems and complex machinery to separate, treat, shred and modify a range of metal and non-metal materials. We invest in the most advanced plant and equipment, which allows us to process metal more effectively and produce the highest quality end products. Furthermore, this enables us to operate at maximum efficiency and minimise emissions. We're actively pioneering projects to become a zero waste company which when complete will allow us to generate more energy than we actually use.

### **Technical Support Manager**

Due to continued growth, EMR is now looking to recruit a Technical Support Manager to deliver best practice and class leading performance to EMR's Shredders and associated machinery. This role will initially focus on the delivery of new plant machinery at one of our Depots in the midlands, with a view to rolling out best practice to other Shredder sites within the group. The Technical Support Manager will improve efficiencies by optimising performance of our Shredders, assist with maintenance and develop plans to reduce costs. Supporting EMR sites through out the UK, it is important the individual can develop strong working relationships as well as deliver maintenance solutions. Implementing preventative maintenance processes to improve long term cost of operations and standardising best practices across all shredders, will be pivotal to the success of the role.

### **The Person:**

You will have previous experience in a similar environment, comprising of complex, industrial machinery that is likely to be related to mechanical handling. Maintenance engineering will be the foundation to your career but it is important to demonstrate experience of H&S, managing Suppliers and improving process.

### **Requirements:**

- Solid understanding and experience of large motors, conveyor belts, bearings, heavy fixed plant
- Practical experience of maintaining and developing heavy fixed plant, having ideally progressed to a supervisory position
- Working knowledge of Total Preventative maintenance (TPM)
- Experience of Asset Management Systems/ Computerised Maintenance Systems

UK travel will be required and a car will be provided as part of the package.

### **Application:**

Please apply to [recruitment@emrgroup.com](mailto:recruitment@emrgroup.com) with an up to date CV and details of your current salary. Alternatively an application form can be requested by contacting the same Email address.

***Our employees have helped build the organisation into the world leading recycling company it is today.***
