

European Metal Recycling is a global leader in metal recycling employing 4500 staff across 170 locations around the world. EMR's recycling process begins with the collection of scrap metal from businesses, manufacturers, construction sites, government bodies and the general public. Our depot and operational teams are instrumental to our success; as they are the first stage in the process and receive delivery of a wide range of metals and materials. Their daily activities are supported by our advanced systems which ensure accurate tracking and security for all materials.

The Role:

As a Trainee Depot Manager you will have the opportunity to learn the metal recycling industry whilst developing a career with UK's largest purchaser of scrap metal. Your role will be varied, working with a range of divisions and functions to develop knowledge that will take you to the next step on the managerial ladder. Initially, this role will be hands on and you will be required to support busy operations at one of our largest depots, whilst keeping close contact with the Depot Manager.

You will have a broad remit which will include managing visitors, ensuring site is legally compliant, organising resources, operating plant equipment and accurately grading materials. Following completion of your EMR introduction you will also undertake formal courses and qualifications relating to WAMITAB and HSE.

The Person:

You will be a motivated, hard working individual who can take responsibility of both staff and situations that may arise on site. Our working hours can be long and we will need cover on Saturday mornings, but if you invest the time with us we will provide a structured development programme to take you to the next level. It takes time to fully understand the business and our industry sector; candidates will need patience as they develop, but the rewards are significant.

It is essential all operations staff are safety conscious and have a good appreciation/awareness of the unique working environment. Applicants should be organised, motivated individuals who can work to deadlines and be prepared to adapt according to business priorities on their particular site. Previous experience in a similar industry relating to a Depot environment, Construction, Waste, Engineering or Aggregates, would be beneficial.

Exceptional communication skills are essential.

The successful candidate will be expected to undergo a DBS check, at the employers expense.

Application:

Please apply to recruitment@emrgroup.com with an up to date cv and details of your current salary. Alternatively an application form can be requested by contacting the same Email address.

Our employees have helped build the organisation into the world leading recycling company it is today.
